

Dear Family

## Summer Examinations 2023

As you may be aware, we hold examination series in the Autumn term and Summer term each year to assess the progress that students make in their learning.

This letter contains details of the exams that will be taken by students in each year group. The exams will test the work covered so far this year. Subject teachers will be sharing revision lists so that students can begin to prepare and revise their learning.

The majority of exams will take place in the Sports Hall supervised by a team of Invigilators and students will be subject to examination regulations and conditions.

### Essential equipment

In order to ensure that students are ready for exams, they will need to bring the following equipment to all examinations:

- Black pen
- Pencil
- Ruler
- Rubber
- Calculator for Science and Geography exams and the Maths Calculator paper
- Protractor for Maths

It is essential that students are well prepared for examination as handing out equipment delays the start of examinations and can be unsettling for students who are ready to begin.

### How to help your child prepare

Our website contains links to the useful online resources that we use as a school, as well as strategies for helping your child to prepare for exams.

We will be holding an **Information Evening for Year 9 and 10 Parents and Carers** where you can find out about some useful revision strategies to support your child in their preparation for exams.

This will be on **Thursday, 4 May 2023 at 6pm** and should last around 30-45 minutes.

Please complete this online form if you are planning on attending.
